## ::Cold-Drawn Mechanical Tubing from China, Germany, India, Italy, Korea and Switzerland Injures U.S. Industry, Says USITC

May 17, 2018

News Release 18-058

Inv. No. 731-TA-1362-1367 (Final)

Contact: Peg O'Laughlin, 202-205-1819

### COLD-DRAWN MECHANICAL TUBING FROM CHINA, GERMANY, INDIA, ITALY, KOREA AND SWITZERLAND INJURES U.S. INDUSTRY, SAYS USITC

The United States International Trade Commission (USITC) today determined that a U.S. industry is materially injured by reason of imports of cold-drawn mechanical tubing from China, Germany, India, Italy, Korea, and Switzerland that the U.S. Department of Commerce (Commerce) has determined are sold in the United States at less than fair value.

Vice Chairman David S. Johanson, and Commissioners Irving A. Williamson and Meredith M. Broadbent voted in the affirmative. Chairman Rhonda K. Schmidtlein and Commissioner Jason E. Kearns did not participate in the votes.

As a result of the USITC's affirmative determinations, Commerce will issue antidumping duty orders on imports of this product from China, Germany, India, Italy, Korea, and Switzerland.

The Commission also made negative findings concerning critical circumstances with regard to imports of this product from China, Italy, and Korea. As a result, imports of cold-drawn mechanical tubing from China, Italy, and Korea will not be subject to retroactive antidumping duties.

The Commission's public report *Cold-Drawn Mechanical Tubing from China, Germany, India, Italy, Korea, and Switzerland* (Inv. Nos. 731-TA-1362-1367 (Final), USITC Publication 4790, May 2018) will contain the views of the Commission and information developed during the investigations.

The report will be available by June 16, 2018; when available, it may be accessed on the USITC website at:
